### Traffic Management

Trustpower customers on broadband plans are currently not shaped in any way.

From a connectivity point of view, unlimited data plans are treated in exactly the same way as limited or capped plans.

Generally our peak traffic times are between 3:30pm and 11:00pm. Customers may experience congestion during these periods.

At peak times there may be congestion on the network however, we are always working to provide the best possible service we can.

We do, however, reserve the right to apply traffic management policies to customers on unlimited data plans should this become required in the future.

### Effects on other services

Your broadband service requires mains power to operate. If power is not available (e.g. during a local power outage) the broadband, and any services which run over it, may stop working unless you have battery backup in your home.

If you are on Naked Broadband you will no longer have a dial tone. This means services such as (but not limited to) Medical and Security Alarms or EFTPOS may stop working. It is your responsibility to check with the provider of existing services to make sure they will operate under such circumstances.

### Other charges

Naked broadband does not have a landline, so there will be no calling or additional phone charges.
