Expected start date of
operating the generation
equipment

Are there dogs on site?

☐ Yes ☐ No

Electrician name

Solar installer name

Electrician phone number

Solar installer phone number

THINGS TO KNOW.

I wish to operate the Generation Equipment (meaning any equipment used to generate electricity into the network) at the installation address stated above, which will be connected to the local network and may supply additional electricity into it.

I confirm that I am the owner of the property at the installation address stated above and/or that I am authorised by the property owner to install and operate the Generation Equipment.

I agree to abide by the General Terms and Conditions for Residential Customers or General Terms and Conditions for Business Customers.

I consent to Mercury disclosing the information provided above to the relevant Network Company and other parties as is required. I understand

that a metering installation fee will be added to my Mercury account. For regular capacity meters, the import/export installation fees are \$195 for urban, \$260 for rural and \$325 for remote. If you require a higher capacity meter, the fee is quotable and we'll let you know of the fee before installation.

I understand that if asbestos is found on my meter board there will be a fee of \$120 for this. I also understand that if the contractor turns down the work due to health and safety reasons, there will be a fee of \$69 added to my account.

I understand that my current pricing plan may change as a result of the new meter installation.

I have included/attached a copy of my accepted network application.

DECLARATION.

NOTE: This form must be signed by the customer requesting this installation.
