

# Wireless Broadband – Naked Six Months Free Broadband Offer Offer Summary – 8 December 2021

## Service Overview

### Service Description

Wireless Broadband connects your home through a 4G wireless connection. We offer four plans for wireless broadband – 60GB, 120GB, 300GB Urban and 300GB Rural.

The wireless broadband offer we have is:

Naked Broadband – this is a wireless broadband connection without a home phone line.

If you select the wireless broadband package with the Six Months Free Broadband offer described below, you will also need to take power services from us at the address where you have your wireless broadband connection.

### Availability

Wireless Broadband is only available in rural and urban areas where applicable 4G coverage and capacity are available. You can check availability of services when signing up via our website or by calling our friendly team on **0800 87 87 87**.

### Additional Data Charges

Additional data packs are available and charged at \$10 for 10GB. Data packs are either automatically or manually applied. A one off 10GB data pack is automatically applied when the full monthly data allowance is consumed (if no manual data packs have been added already, otherwise it will activate after the manually added data pack has been consumed). There is only one automatically applied data pack available per month. There are 4 manual data packs available for purchase per month for the 60GB and 120GB plans, and 2 manual data packs per month for the 300GB plans. Data packs are available for use for 30 days from purchase.

We'll send you an email and/or text once you reach 80% of your monthly data allowance, and again once you reach 100%.

## Broadband Performance

### Performance

Plan	Average Peak download speed	Average Peak upload speed
Wireless Broadband	29Mbps*	17Mbps*

\*Industry average speeds for WBB at peak times (source MBNZ Spring Edition 2021). You may experience a higher or lower speed than this. Factors that may influence your speed include the device you are using and its capabilities, your operating system and web-browser, if you're connecting wirelessly to your router, and the number of devices connecting via WiFi. As your plan uses a wireless connection, then factors such as the distance you are from a cell tower, the network capability and the overall use of that cell tower by other consumers can impact the speed experienced. For wireless broadband, you must use the router supplied by Trustpower. This router is capable of providing the estimated peak time average speeds, subject to the other factors described above.

**Traffic Management**

We reserve the right to manage traffic at peak times (for example, by limiting the speed at which you can download or upload content), to ensure all customers get the best possible experience even at busy times. Overall, this should have a positive benefit for our customers. If we make any changes to this policy which will have a material impact on you we will let you know.

---

**Effects on other services**

Your broadband service requires mains power to operate. If power is not available (e.g. during a local power outage) the broadband, and any services which run over it, may stop working unless you have battery backup in your home.

This means services such as (but not limited to) Medical and Security Alarms or EFTPOS may stop working. It is your responsibility to check with the provider of existing services to make sure they will operate under such circumstances.

---

**Other charges**

Naked broadband does not have a landline, so there will be no calling or additional phone charges.

For your Six Months Free Broadband bundle, power (and gas, if applicable) charges will apply for your energy services.

---

**Disputes**

At Trustpower, we value customer feedback and take care to address complaints.
