

Ultra Fast Broadband with home phone – FibreMax

Samsung You Choose Offer

Offer Summary – 4 December 2018

Service Overview

Service Description Ultra Fast Broadband FibreMax is a faster broadband service for residential customers.

When your house is connected to our network via a fibre optic connection, the throughput is both higher, and of a better consistency, than DSL broadband. This means that fibre will deliver a faster speed.

FibreMax provides speeds of between 700mbps and 900mbps download and 400 – 450mbps upload in optimal conditions. However actual speeds may vary and are affected by many factors which may be outside our control including the device you are using and its capabilities, the number of devices connected, your operating system and web-browser, and if you're connecting wirelessly to your modem.

The Ultra Fast Broadband FibreMax package we offer is:
An Ultra Fast Broadband connection and Home Phone bundle.

With this package you'll get a landline and a phone number as well as your broadband. The landline connects you to the public phone network so you can make local, national, international and mobile calls from your home phone.

With your Ultra Fast Broadband you will have a variety of calling rates with Tolls free calling areas to choose from. For more details [click here](#)

Availability Ultra Fast Broadband is not available everywhere in New Zealand. Fibre is becoming available to more and more people and communities each day. To see if fibre is available to you, check your address at [click here](#)

Alternatively, you can check availability of services when signing up via our website or by calling our friendly team on **0800 87 87 87**.

Traffic Management

Trustpower customers on unlimited data plans are currently not shaped in any way. From a connectivity point of view, unlimited data plans are treated in exactly the same way as limited or capped plans.

Generally our peak traffic times are between 3:30pm and 11:00pm. Customers may experience congestion during these periods.

At peak times there may be congestion on the network however, we are always working to provide the best possible service we can

We do, however, reserve the right to apply traffic management policies to customers on unlimited data plans should this become required in the future.

Effects on other services

Your broadband service requires mains power to operate. If power is not available (e.g. during a local power outage) the broadband, and any services which run over it, may stop working unless you have battery backup in your home.

This means services such as (but not limited to) Medical and Security Alarms or EFTPOS may stop working. It is your responsibility to check with the provider of existing services to make sure they will operate under such circumstances.

Other charges

This Ultra Fast Broadband plan comes with a landline. Your local calls are free.

Any calls made to national, international, mobile and 0900 numbers will be charged at their standard rate. We do have additional calling packages available for National, Mobile and some International destinations.

Additional charges may apply for items such as non-standard installations, additional in-home technician work performed at time of connection etc.

Please see our Ultra Fast Broadband Terms and Conditions.
